PLANTERS NURSERY CO.
CHANGED FROM THE DYER BATES CO.

The letters from our customers suggested this change. Just Growers and Planters. No use for the extra Jobber, Retailer or Agent. Besides it not only saves three profits but expense of three packings and trees drying out. Read these letters and look how fresh the trees arrived. So we thought the name Planters Nursery Co., would make it plainer that we grow trees by the million for the planters.

Low Prices

You can see from the letters that lots of people were afraid they were too cheap to be good. But when they got the trees, both them and their neighbors said they were the best trees they ever saw. Of course they will please every planter. You see they are the same high class trees that jobbers have bought of us for years. Just a new way of selling. We make money because we grow them by the million.

The Difference Between Planters Nursery Co., and Others

We grow Trees by The Million and Sell Straight to The Planter. This way we can guarantee them satisfactory to you, or your money back. You can get trees true to name and fresh so they grow. The old way we could not tell what the jobbers, retailers or agents done after they left us. The jobber cannot sell to you because the retailer would boycott him. So you had just two ways to buy of the agent or of the mail order retailers who advertised, "Buy Trees of Me at Wholesale Price and Save Agents 40 per cent Commission."

Now wholesale prices are the prices the growers make to the jobbers, who buy carloads and sometimes train loads. Its not reasonable, not even honest to try to make people think they buy trees this way at wholesale.

The Facts

We do not claim to sell trees at wholesale prices, but we can sell them straight to the planters and make money, and cut out all the old plan. Of course, the other nurseries are fighting the new way. Remember we have grown trees by the million for more than twenty years. We started this new way last spring.

Notice to Our Customers

This circular goes to every customer shipped to last spring. Won't you send us a card or a letter telling how your trees are growing. Now we do not have a single dissatisfied customer that we know of and with our guarantee it is his own fault if he is not satisfied. We do not know how to make a more fair guarantee. But here is our special offer. Now after you have had the trees all summer, if you are not perfectly satisfied report to us and we will still make it satisfactory to you.

WON'T EVERY ONE OF YOU WRITE US A LINE?
YOU CAN HELP THE NEW WAY
MAKES REGULAR CUSTOMERS.

Received the trees all right and was sure in fine condition. I am more than pleased with them. I want another order this fall.

I have heard that whenever we want any nursery stock we sure will always buy from you. I sure saved money on my trees and were the nicest roots on trees I ever saw. G. A. Williams, Meeker, Okla.

BEATS FIVE OLD WAY NURSERIES.

The trees arrived in good shape. I had to open the box to show the people the trees before I left town. They all thought I would be stung ordering trees by mail order but they all left and said I had as good trees as ever shipped in. My neighbors come to see them and they were all satisfied.

I have ordered from five other nurseries but yours is doing better than any of the others. I am proud the way they are growing.

When I need trees I will order from you and my neighbors will. P. L. Nelson, Asaria, Kansas.

WILL ORDER AGAIN.

In reply to yours of the 6th inst., in regard to the trees I ordered from you. Will say I have received them all O. K. and have them sent out. They all looked like good healthy trees and I am well satisfied with them. When I am in need of trees will send you an order. R. D. Lawrence, Sand Creek, Oklahoma.

THE SHORT ROUTE DID IT.

I was pleased with the trees received from you. The trees and grape vines were of good quality and the prices for same were reasonable. The agents commission was certainly cut out. W. N. Ole, Cottonwood Falls, Kansas.

MAKES CUSTOMERS OF NEIGHBORS.

I saw the trees that you sent to my neighbor and they looked so good to me that I wish you to send me $900Speciosa Catalpa for the $105.00 encased. Carl Schroeder, Olpe, Kansas.

WELL PACKED.

I received your letter of April 3rd wanting me to let you know how I like them. I have just received the trees today. Have been a long time on the road, but they are fine trees. Am well satisfied with them. H. S. Cusick, Wayside, Kansas.

NEW WAY INSURES RESULTS.

Your trees arrived in fine shape. Never had trees shipped to me in that shape that you were shipped to me. Am well pleased with them. They are a nice lot of trees and vines. When I want more trees I will send to you for them. W. H. Wright, Kingman, Kansas.

YES TELL YOUR NEIGHBORS.

In reply to yours will say the trees and shrubs received in good condition and are growing fine. Am greatly pleased with your goods and will remember you in the future. You look good to us and we will do all we can with our neighbors to interest them in your favor. Wishing you every success. I am, G. W. Hall, Springdale, Ark.

SURPRISED WITH QUALITY AND PRICE.

The trees received in good condition. Never saw nicer trees with better roots and so cheap. Am more than pleased and will certainly recommend them to any one wanting trees. Would like to order some of the fruit trees on the special price list you enclosed, but planting any kind of a tree in this part of Oklahoma is an experiment. But believe me, if I should order more trees you will get the order. Think I would like tall planting best here. J. J. Kilby, Gotebo, Oklahoma.

PLANTED TREES GROW FIRST TIME.

The fruit trees I ordered from you arrived O. K. and on time. They sure look like good stock. I have been loving all the cherry trees that I have put out for over a year. I think the trouble was that the trees were 2 or 3 years old. Of course you understand the trees that I have lost did not come from you people; the trees that you sent me are all alive and growing. F. H. Bishop, Superior, Nebraska.

SEND SECOND ORDER.

Allow me to thank you for the way you filled my order for shrubs and trees. Everything was so fresh and had such strong root system that they will grow "right off the bat." Am sending you another order. H. W. Sturtevant, Delavan, Wis.

ALL ALIVE, LIKE THE NEW WAY.

The trees were certainly fine and all are alive and they had such fresh and fine roots and tops too. Will send you another order this fall.

I think your plan is the right plan for the man that wants good trees and at a price that all can have some.

I expect to put out quite a lot of grape vines this fall. I fully recommend you to any one treatment and straight business method. J. H. McKiveran, McAlester, Oklahoma.

SO GOOD CAN HARDLY KEEP FROM ORDERING MORE.

Your trees were far better than I expected to get. We got some trees of an agent about the time yours came. We paid twenty-seven cents apiece for peach trees like you sell for seven cents. I am telling my neighbors where to get cheap and good trees.

If I were going to plant my whole farm in trees I would send to you for them. Don't write to me any more for I might order some more. J. N. Lamb, Fredonia, Kansas.

BEETTER ROOTS THAN OTHERS.

Your trees arrived in good shape, every one looked as if it would be sure to grow. I am much pleased with them as they have better roots than any we have got from local nurseries. Have them all set where they are to grow and look for good results, will speak a good word for you at any time. Yours with satisfaction, F. F. Ellerbeck, Princeton, Kansas.

NOT A DEAD TREE, COST LESS THAN HALF.

You received and will say that the trees I received of you are satisfactory, just fine. They all are growing every one of them. Every one sent you to any one planting and the cost is hardly half what agents charge and better stock. Yours respectfully. G. O. Loveland, Morganville, Kansas.

P. S. Will send you another order this fall or next spring.

NOT STUNG, JUST THE WRONG WAY.

I received the trees I ordered of you and they are all O. K. I think man is a little busy to buy of these agents that run around the country. Your trees are better and cheaper than from these traveling agents. Even if they do replace at half price for all that die. I have been stung several times myself. No more for me. E. E. Johnson, Asaria, Kansas.

SECOND ORDER SHOWS VALUE OF SHORT ROUTE.

I am just in receipt of your second shipment of fruit trees, vines and shrubs you shipped to me this spring and I must say they are as fresh and fine as could be wished for. Your plan of from the grower to the planter is a good plan and you have my appreciation and best wishes. G. ii. Bowman, Coffeyville, Kansas.

USES EXCLUSION POINTS TO DESCRIBE PLANTERS NURSERY WAY.

You asked me how I like my trees: Well! Well! how do I like my trees? I've set lots of trees before but these are the best I ever set. I received the trees at the depot and I told the agent it was a little more money than I expected to pay and I would look at them. So I just told the agent it was a little more money than I had expected and I would look at them. Then I told him there was no other way. Did not find the difference until I got home and I was the proudlest mortar you ever saw. The pear trees were very fine and when the tree looked like it would grow. I am very thankful to you. After this if I want trees I will send to you for them. B. D. Wallace, Cheney, Kansas.
Apple

What I mean by first class apple is, that they are clean, thrifty, healthy trees. Every shipment sent under certificate of Inspection by State Entomologist. Of course a two or three foot, two year tree is not as good as a one year tree of the same size. A yearling calf that weighs six hundred pounds is better than a two year of the same weight. But we won't send culled trees of any size. We could not hold your trade that way. Selling straight to you enables us to make these prices on the best trees that grow.

Apple—Summer and Fall Varieties

I am just writing these varieties down in order as they ripen. I think that will be clearer.

**YELLOW TRANSPARENT.** Light transparent yellow, earliest of all; bears young.

**EARLY HARVEST.** Light yellow, flat shaped, old favorite summer apple.

**RED JUNE.** Solid bright red, white flesh, fine cooking apple.

**SWEET JUNE.** Deep rich yellow, sweet apple, flat shaped.

**DUCHESS OF OLDENBURG.** Large flat shape, red striped, white meated, fine for cooking.

**COOLP顿EARLY WHITE.** Large round shape, straw color yellow, fine for mid summer. Bears young.

**MAIDEN BASH.** Light yellow, blushed cheek, tart, well known variety.

**RAMBO.** Round, a little oblong, red striped, white meated, bears young.

**PENNSYLVANIA RED STREAK.** Called English Rambo, very large, green, dull red stripes, good fall variety.

Early and Late Winter Varieties

**GRIMES GOLDEN.** Large round golden yellow, rich yellow meat, fine quality.

**JONATHAN.** Large round, oblong, deep solid red color, rich and juicy. One of the best quality apples for family orchard, and one of the top bunchers for commercial profit. Brings premium price on all city markets.

**DELICIOUS.** Large round, slightly peak nose with knobs or uneven points on blossom ends. Red striped, good quality.

**ROME BEAUTY.** Large round, flat shaped red striped covering yellow background, fine quality, bears young, blooms later than other varieties, escapes frosts and makes full crop when other varieties fail.

I went fishing in Colorado and while I was out there I went down in that big orchard country and I asked ten or fifteen of the biggest growers there what four apples made them the most money and you know nearly everyone put Rome Beauty first, and I believe all but one included it in their varieties. It does well any place I ever saw it grow. This variety should be planted heavy, it is a big money maker.

NORTHERN SPY. Large bright red on yellow background, spicy, well known old variety.

WINTER BANANA. Very large light yellow with blushing, resembles Maiden Blush only twice as large.

**WHITE W PEARMAIN.** Oblong, greenish yellow, extra fine quality, bears heavy, money maker.

**BLACK BEN DAVIS.** Big red apple, poor quality, would not plant it myself.

**WHITE PEARS.** Large solid dark red, white meat, bears heavy, a money maker.

**STAYMAN WINEGAP.** Average larger than Black Ben, red striped over rich yellow background, sometimes almost solid red, rich yellow meat, juicy, if your eyes were shut you would think you were eating a fine winegap. This apple is a big money maker in commercial orchards, size and quality combined, bears young and heavy, do not fail to plant of this in every orchard, perhaps stands at the head of all apples for money making.

SCHENZBURG. Large dark red, very oblong, rich flavor.

**GANO.** Large bright solid red, white meat, one of the big money makers in commercial orchards.

**WINEGAP.** Big red apple, a favorite with everybody, well known.

**M. B. TWIG.** Called improved winesap, very large dark red, brings big money.

**ARKANSAS BLACK.** Round dark red, almost black, late keeper, showy market variety.

I put a star by some of the varieties I would recommend for for family orchard and red large for both family and Commercial orchards. Don't plant too many varieties for a Commercial orchard.

Peach

Last year seven car loads of ripe peaches from Colorado was sold right here in our County at the rate of $3.00 per bushel. Now you plant one hundred and twenty trees to the acre. They begin to bear in two years. The third and fourth year figure three bushels to the tree. That's reasonable because I picked five bushel from one tree right in my own yard when four years of age. Ten acres would yield $600 bushel, just about ten times an average corn crop. Plant ten acres peaches now. Furnish your home market. No use giving railroad more freight alone than it costs to grow crop. Now this isn't a money making plan right where you live? Look at my prices. It don't cost much for ten acres.

Season of ripening varies from ten days to two weeks, according to weather each season. I list varieties in order of ripening. All fine family orchards and local markets. I just giving you the cream of varieties out of over a hundred that I have grown in my twenty years experience. Yes, peaches and cream, that's what this list is.

For big commercial orchards plant the varieties I have marked with a star.

**Varieties Ripening June 1st to August 1st**

**ALEXANDER.** Best one of that early bunch to ripen first in the spring. Red variety, half cling, good for pies.

**EARLY WONDER.** Yes, for over twenty years I have considered early peaches just watery half ripe fruit, unfit for children to eat. This peach is a wonder. Fine quality.
ripens even clear to the pit. Showy, luscious red, medium
size, small pit, perfect free stone. While meat with red
juice which colors the meat when full ripe. Brings high-
market price.

Now bearing, words will not describe. Bears the sec-
ond year and keeps at it. Fourteen year trees hardly and
loaded down, ten bushel to the tree. Three bushel to the
trees second year says an Oklahoma Fruit-Grower. Records
like this from Massachusetts, New Mexico, Iowa and Mary-
land.

Price 4 to 5 feet   50c $5.00
Price 5 to 6 feet   40c  4.00

TRIUMPH. Plant this one, bears loaded, thin off three
fourths of the fruit, leafy, loads the tree down, yellow like
an orange clear through with bright red cheek, half cling.

GREENSBORO. White free stone, tastes like a real
peach. Dis Nicely Hardy.

MAMIE ROSS. My mouth waters winter red summer
for it. Big cream white with just a little red blush, half
cling unarmed seed. Comes off seed easy then, cannot eat
it without honey juice dripping out of your mouth. Fine
canned, bears loaded down, hardy. You get a crop of Mamie
Ross when others are killed by winter weather, better than I
can describe it.

CARMAN. White free stone, red cheeked, fire quality,
hardy so good that some Norwegians call it Alton.

CHAMPION. Queen Bee of white free stone peaches,
slight red blush, sugary sweet, nothing finer for quality,
large, hardy, bears heavy. Always buy Champion in every
plant.

CRAWFORD'S EARLY. Good yellow free stone with red
cheek, buds little tender, not so hardy as some others.

Varieties Ripening August 1st to October 1st

BELLE OF GEORGIA. I called it white Elberta. Big
white free stone, red blush, very hardy, bears heavy, fine
quality, good shipped, you just can't plant too many of this.

ELBERTA. A big yellow free stone. You all know it
makes more money in commercial orchards than any other
one peach, good quality, bears well and can be shipped
clear across the country. Plant half to three-fourths of your
orchard to this variety for commercial selling.

CHINESE CLING. Cell it White Elberta Cling with
red blush, heavily hardy but sweet, fine quality, sells at highest
price, one of the harder ones.

MOUNTAIN ROSE. Almost round, white free stone,
bright red cheek, good quality, favorite for canning.

CRAWFORD'S LATE. Big golden yellow, free stone,
dark red cheek, best of quality, old favorite peach.

CAPT. PDE. Big yellow snowy free stone peach, fine
quality. Good commercial peach to follow Elberta ten days
later.

STUMP. Very large pure white free store, rots badly,
other varieties are safer to plant, quality is fine.

WONDERFUL. Large yellow freestone, good on ac-
count of being late, and peaches like this are scarce.

HEATH CLING. Big white cling, almost as large as a
teaup, old variety well known, everybody likes it.

SALWAY. A round yellow free stone, ripening about
October 1st, good on account of late season. Bears heavy.

BLUE CLING. Blood red, skin and meat clear to seed,
called old Irish peach. Women like it for sweet pickling.

HENRIETTA CLING. Very large yellow cling with red
cheek, good quality, favorite for canning.

What five varieties would I plant first? Mamie Ross,
Champion, Belle of Georgia, Elberta, and Crawford's Late.

But I would want some other varieties to fill out the
reason, like Triumph, Carman, Chinese Cling and Heath's
Cling. Yes I would want some late yellow peaches, too
like Salway, Wonderful and Henrietta Cling.

Crab Apple

Some prices as other apples.

WHITNEY. Early large red striped, mild, good eating,
about half crab.

TRANSCENDENT. Medium size, light yellow striped
red, favorite variety.

FLORENCE. Medium to large size, red with yellow
background, bears young, very heavy, fine quality, one of
the best.

Plum

This is about the easiest and quickest fruit you can
grow. Japanese plums are big, rich, sweet and spicy like
peaches. Bear the second year. Take the five varieties
I mark with a star.

Price 2 to 3 feet   18c $1.45 $12.00 $100.00
Price 2 to 4 feet   22c  2.00  15.00  140.00
Price 4 to 5 feet   27c  2.20  19.00  190.00

Plum Varieties

In Order of Ripening, June 1st to August 20th

RED JUNE. Bright red, yellow meat, rich, sweet and
juice like a peach.

WILD GOOSE. Bright red, yellow meat, tastes sweet
when ripe off tree but awfully sour when cooked. An ideal
variety, plant a few in each orchard.

ABUNDANCE. Larger than goose plum, greenish yel-
loow covered with dull red, sugary sweet juice like honey,
bears loaded down second year, bears itself to death some-
times by tenth year. But it does more work than some do
in forty years.

HANK. Sprawling tree, made that way so it will
canily down to the ground with the loads of fruit
just like an umbrella, bears fruit from one end of limb to
other like Gooseberries, large red and yellow, yellow meat,
test plum that grows, bears young and heavy, fruit keeps
for long shipments.

GOLD. Golden yellow a touch of red, solid, a little of
the plum spicy flavor, bears loaded down, hardy every place,
rold by lots of Nurserymen for One Dollar per tree. Look
at my prices.

SATSUMA. Large, big red color, skin, juice and
meat. Every woman wants them for preserving, fine qual-
ity too.

KISSKING. Late Japanese plum, gets killed some times
when spring frost. Beers bearing second year, big as peaches,
seven inches around. Deep wine red color.

BLUE DAZZLER. Little blue Dawson, good quality, rip-
er late, rown about bearing, sometimes waits seven or
eight years.

Apricot

Get the right varieties. Grow and bear wherever
peaches do well. Grow on rocky points and hills. Saw a
fine orchard on rocky hill where ground could not be
plowed.

Price 2 to 3 feet   15c $1.40 $12.00 $100.00
Price 2 to 4 feet   18c  1.60  16.00  140.00
Price 4 to 5 feet   22c  2.10  19.00  190.00

Now look at Apricot prices. Less than half other
company prices. I made these cheap a purpose. I want
you to plant some now. You can make rock hill land pay
more money than bottom Alfalfa land.

Apricot Varieties

Russian Apricots are generally seedlings. Early Golden
is too little and too easy killed with frost.

QUALITY FIRST. YOU ARE YOUR OWN JUDGE. READ GUARANTEE.
VOLUME NEXT. HELP US GET IT.
HOW WILL WE GET 80,000 PLANTERS THIS YEAR? $5.00 IN CASH
FOR BEST LETTER TELLING HOW

MOORPARK. Large flat, old gold color with red cheek, perfect free stone, sweet and rich, one of the very best.
ROYAL. Light golden yellow. Perfect free stone, later than Moorgpark. The above two varieties of Apricot are all I recommend.

Pears

"I don't know the difference between a Standard and Dwarf pear," a fellow said to me. "Lots of people don't," said I.

If a pear is grafted or budded on pear seedlings it makes a big natural tree. That is a Standard. If the same pear is budded or grafted on quince seedlings, that makes a dwarf tree, because the quince is a bush or dwarf tree.

Some varieties are good in either standard or dwarf. Some best just is one. Of course Standard trees bear lots the most pears. Dwarf trees bear quick. They are good for yards.

KEIFFER. Thirty two-year-old trees, borne every year since they were three years old, except two, right here in this county. Orchard neglected too. Orchard full of weeds and forest tree sprouts three inches in diameter. Still trees bear twenty bushels to the tree. This pear is like a Pecan Duke, stands lots of dry weather, yet grows well on overflow bottom land. Saw trees under water forty eight hours. Didn't hurt them a bit. You can plant five to ten acres of Keiffer pear with five to ten per cent of Garber pear trees to fertilize them and make more money with less trouble than any fruit crop I know of. Not as good quality pear as some others but bears sure, bears young, great big sized fruit, seventy five of them will make a bushel, can keep until Christmas. Pick off of tree when seeds get black in fall. Box them up and they are a fine big yellow pear, splendid for canning, preserving and big commercial money makers.

GARBER. About the same quality as Keiffer, except much, just as hardy a tree, bears well, plant five to ten per cent of them with Keiffer.

</tbody>
</table>

Notice this photograph. It shows my small-size grape vines. Look at the fine roots, then read my prices on this side.

CLAPP'S FAVORITE. Fine sweet sugary, luscious summer pear.
SECKLE. A small sweet pear, known as sugar pear.
BARTLETT. Old favorite variety on account of fine quality.
BERRY BARGAIN. Big, fine quality pear, like Bartlett, ripening a little later.

Dwarf Pears

<table>

</table>

DUCHESS. I called it a big, dumpy set pear, weighs a pound. Does best as a dwarf. Fair quality.

BARTLETT AND SECKLE. We can also furnish budded as dwarf trees.

Cherries

Buddied French Cherry roots to keep trees from sprouting. See my prices on one year cherry trees. That's the kind of trees to plant, older cherry trees don't do so well.

EARLY RICHMOND. Bright red rich early cherry, one of the best.
MONTMORENCY. Large red cherry of the Richmond type, ripening about ten days later.
ENGLISH MORELLO. Large black red cherry Trees, short lived, not so hardy as others.
WARG. Improved English Morello. Same type fruit, trees harder and better. Bears heavy.

COMPASS BERRY—Seed like a plum; flavor of a cherry. Should be called Cherry Plum. Fruit purple red, almost one inch in diameter. Bears first the second year, sometimes first year. Blooms late, missing frost. Hardest fruit can plant. Stands drought. Grows on all kinds of soils.

Price 4 to 5 feet | .35c | .30c | .25c |
|------------------|------|------|------|

Price 3 to 4 feet | .30c | .25c | .20c |

Grape

Grow easy. Bear quick. Doctors give sweet grape juice to sick people. Why not eat grapes and not have a doctor.

Big opening to make money planting grape now. Been neglected. Boys or girls get an acre of ground from your folks. Plant five hundred and twenty vines on it. You can raise ten to twenty pounds to the vine easy. Look what you can make an acre. Aren't they shipping in grape from New York right where you live.

Notice this photograph. It shows my small-size grape vines. Look at the fine roots, then read my prices on this side.

TREES MAKE HOMES. FRUIT SAVES DOCTOR BILLS. ONE ACRE ORCHARD ADDS MORE VALUE TO A FARM THAN $1000 HOUSE.
GIVE THE BOYS AND GIRLS A SMALL PIECE OF GROUND TO GROW FRUIT AND MAKE MONEY.

Varieties

MOORE'S EARLY. Big black grape, compact clusters ripens early.
CAMPBELL'S EARLY. Big black early grape, new variety.
WORDEN. Remembers Concord, ripens a week earlier, sweeter, finer quality, thin skinned.
CONCORD. Black well known variety, hardy, good keeper, cropper, firm skinned, ships well.
DIAMOND. Very fine quality, hardy, white grape.
NIAGARA. Ought to be called white Concord on account of the hardness and fine quality.

Blackberries and Dewberries

Early Harvest and Kenoyer. Early varieties that are best. Merey and Ward, Late varieties that are best. Laaréta, Best Dewberry.

One Acre Yields $350

I have been growing blackberries in this section for 17 years and my crops have averaged from $200 to $350 per acre each year. My patch is growing on dark, sandy loam, located three miles southeast of Arkansas City. My 1914 crop from 1 acre sold for $350. In 1915, ½ acre of Early Harvest yielded 100 crates sold for $250.—Harry Wallace.

$230 an Acre Fifteen Months After Planting

In April 1915 I planted 1-3 acre of blackberry. July 1915 I sold 32 crates at $2.25 and $2.50 a crate.—J. C. Mohler, Arkansas City.

Raspberries

Red Raspberries not very hardy for the West. Best Blackcap, marked with star, bear double standard varieties.

Asparagus

Conover's Colossal. Best of all. Each 10c 100 1000

Shade and Ornamental Trees

Shade and shade for the year, makes a house home-like. Your wife is there all day. Don't forget shade this spring. You don't need to at our prices.

Rhubarb

I got it straight from the man who introduced this tree, Speicosa. Catalpa makes best plants. Lasts in ground seventy years. Takes railroad ties out of oak five times. Fine lumber, better furniture wood than oak. United States government printed over fifty bulletins on this valuable tree. Makes $900 an acre in eight years. We saw an af-filavit from a German who put out ten acres. It did it for him. Grows on overflow land, where crops are washed out. Plant trees three or four feet by eight. Takes fourteen hundred to eighteen hundred to the acre. We made low price to show you they would make money for you.

LIKES THE NEW WAY.
Received your advertising sheet and will say that I won't set any more trees this fall and in
to the trees you sent me they were first class in
every way. I have got trees from other nurseries and
paid three and four times as much for them that was not
half as good. You are the very first fruit tree manufacturer I ever dealt
with that didn't skin me. As ever, J. J. Bond,
Columbus, Kansas.

Concord $1.50; 10 St. Regis Red Everbearing Raspberry $1.50.

Post Prepaid, only 61 cents.

NO. 12.
Four hardy flowering shrubs by Parcel Post Prepaid,
only 97 cents. 1 Althea, 1 Snowball, 1 Lilac, and 1 Spirea.

OLD WAY AND PLANTERS NURSERY WAY.
Am certainly mighty well pleased with the trees you
sent me. I didn't receive a scrub in the bunch. I bought
trees at the nursery of — — Kansas, last spring
and about half were dead when I received them and they
wrote me they would replace them for half but I could
buy from you cheaper than that. I will recommend you
to all. Clyde Dickerson, Blackwell, Oklahoma.

Planter's Nursery Way of Selling Straight To You

READ BEFORE ORDERING. About Prices, Freight and
How to Order.

PRICES. “kind of trees means apple, peach, or plum,
etc. “Variety” means name of each different one of
kind: as kind of fruit, peach, variety, Elberta.
Varieties are tied ten in a bunch. Order that way for
lowest prices.

Each price for less than 10 of a single variety:
10 price for less than 50 if 50 of a variety.
100 price on 50 or more of a kind if 50 of a variety.
1000 price for 300 or more of a kind if 300 of a variety.

FREIGHT OR EXPRESS. Railroads run out of here ten
different directions like wagon spokes. Makes quick and
cheap freight every direction. Special cheap express
rates on Nursery stock. Prices quoted are for stock packed
free on board cars at Winfield.

FREE PACKING. I make no charge for packing trees
fresh in paper lined box or small orders in special protected
totes. Packed this way sent straight to you they grow.

CERTIFICATE BY STATE ENTOMOLOGIST. Every
shipment sent out under printed certificate showing our
stock found clean and healthy by examination.

CONDITION GUARANTEED. We guarantee all orders to
arrive in good condition. Any orders lost or damaged in
transit will be re-filled at once by us free of charge.

GUARANTEED. We guarantee every article to be ex-
actly as represented or else will return your purchase
and pay freight both ways. Yes, that means trees true to
name. It makes that in case of an error and any trees
prove not true to name you would get your purchase price
plus freight returned to you in cash. But trees sold straight
from us to you do not get mixed like four-profit-plan trees.

REFERENCE. You can write the First National Bank,
the Cowley County National Bank, or any business man of
this town about The Planters Nursery Company and trees.

HOW TO ORDER. Write out your order on enclosed
blank. Be sure to fill it out and write your name and Post
Office plain. If you lose blank send order on any paper.

Send money handiest way. Check is all right. Make it
payable to The Planters Nursery Company.

TERMS. Cash before shipment is our rule. It cuts out
extra expense of bookkeeping, collecting and you paying
for the other fellows stuff. If you want to you can send
fourth cash with order then we will hold stock for you and
you can send balance when your order is shipped or pay it
on delivery of stock.

MONEY DEPOSIT OFFER
Money with order, saves bookkeeping, time and loss and helps us to keep dollars in your pocket. But if you want to see
your trees first and make us safe, you can do so by attaching this coupon to your order. Note—5 per cent discount not allow-
ed on this offer.

(Name) ............................................. has deposited $ ............... in this bank to be forwarded to you by us after he has received his nursery stock
ordered from you, which it is agreed must be satisfactory to him.

Signature of Bank ................................

NOTE—Direct your bank to forward money to us after you have unpacked and examined your
trees. If not perfectly satisfactory, notify us at once.
